analytica conference

(April 10–12, 2018, all day at the ICM)

The analytica conference is the most important **interface between science and industry**. Here researchers, scientists and users meet for direct exchange. This year, about **150 top-class speakers and some 1,700 participants** from all over the world are expected to be present. Another highlight of the analytica conference is the poster show, in which young scientists present their research results and innovative applications.

Admission to the **analytica conference** is **free of charge** for all participants of analytica with a valid ticket.

Excerpt from the program 2018:

- Big Data Tools for Omics
- Bioinformatics and Big Data Applications in Microbiome Analysis
- Pharmaceutical Protein Characterization
- Genomics
- Metabolomics

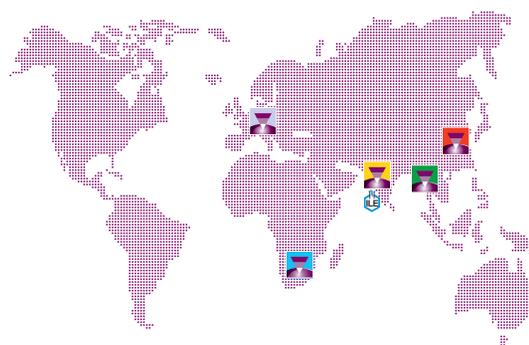

analytica.de/conference

THE ORGANIZERS.

The analytica conference is organized by **Forum Analytik**, an alliance of the most important scientific associations in the German-speaking region.

analytica worldwide—globally networked knowledge

INFORMATION FOR VISITORS PHARMACEUTICAL INDUSTRY

26th International Trade Fair for Laboratory Technology,
Analysis, Biotechnology and analytica conference
April 10–13, 2018 | Messe München | analytica.de

Pharmaceutical industry— modern APIs with potential

Scientists from research and industry are developing **novel active ingredients and solutions** for current issues from various areas of application in the pharmaceutical industry. Equipment and expertise as guarantors of innovation, orientation towards **technology transfer, patents and registration procedures** span the entire spectrum of the chemical-pharmaceutical industry.

The most important topics for the pharmaceutical industry at a glance:

- Basic research
- Instrument-based analysis
- Synthesis methods
- Biotechnology and genetic engineering
- Big Data handling
- Quality assurance and control
- Metabolomics
- Sterile and cleanroom technology
- Nanotechnology
- Personalized diagnostics and gene therapies

Live Labs Material and Food Analysis

Experience modern laboratory worlds live at analytica 2018: In real laboratory set-ups, **renowned experts and international market leaders** conduct experiments to present the latest analysis methods based on selected applications. Experience new exciting approaches in live operation.

Several times a day, there are 30-minute **experimental presentations** on the Live Lab lines: from sample preparation through analysis to interpretation of the results. Questions from the audience will also be answered by the experts.

Live demonstrations from April 10 to 12, 2018, at 11:00, 13:00 and 15:00, and on April 13, 2018, at 11:00 and 13:00.

WORKPLACE HEALTH AND SAFETY—AN EXPLOSIVE ISSUE. (Hall B2)

Safety must be a top priority in the laboratory world. At our special show, the topics of workplace health and safety are addressed from all perspectives. The company asecos holds daily **live experimental presentations** for demonstration of hazards and preventive measures in dealing with hazardous substances.

Main topics:

- Fires and Explosions
- Safe Handling of Hazardous Substances
- Avoiding of Health Hazards

powered by **asecos**

Live demonstrations from April 10 to 13, 2018, at 11:00, 14:00 and 15:00.

Forums

The analytica forums are practice-oriented platforms for laboratory users. As a visitor, you benefit from interesting best-practice lectures and state-of-the-art tips for daily lab work.

FORUM BIOTECH AND LABORATORY & ANALYSIS.

(April 10–13, 2018, Hall A3, incl. Finance Day and Focus Day "Personalized Medicine")

Exhibitor presentations and trend reports on innovative products in the fields of life science and biotechnology:

- Next Sequencing
- State-of-the-art tips on best practice in instrumental analysis
- Food and Drinking Water Analysis

Part of the program is arranged by  LSR

FORUM DIGITAL TRANSFORMATION.

(April 10–13, 2018, Hall B2)

Current solutions for the world of tomorrow—in the form of lectures and discussions:

- New standards in the laboratory planning of tomorrow
- What does the laboratory of the future look like?
- Optimization of laboratory processes
- New developments from the fields of automation and robotics
- Managing the diversity and in particular the security of data
- Advantages of digital networking (interfaces/LIMS)—and what it means for manufacturers and users
