

Winner of the  
**productronica**  
innovation award 2019

## Cables, Coils & Hybrids cluster – Zoller + Fröhlich

The new AM 04 Duomatic from Zoller + Fröhlich bridges the gap between fully automated and manual cable assembly. Its special feature is that two cross sections of any length can be processed at the same time. Operators can switch between set cross sections at the push of a button. A conversion process which used to take around two minutes and had to be undertaken by trained

staff can now be carried out in 0.2 seconds at the push of a button. In short, thanks to its universal, semi-automated functionality which is the only one of its kind anywhere in the world, the AM 04 Duomatic sets new benchmarks in terms of time, cost and quality optimization for stripping and crimping in cable assembly. Small and medium-sized enterprises now have the opportunity to optimize production without having to make any huge investments.

### **Statement: Christoph Fröhlich, CEO, Zoller + Fröhlich GmbH**

“As one of the first ever exhibitors at productronica, our father, Hans Fröhlich, recognized the importance of this trade fair early on. As the second generation at the helm of the company, my sister and I are extremely honored to accept the Innovation Award as part of this event. We are particularly proud of the fact that by combining the traditional

values of a family business with high-tech production in Wangen im Allgäu we have been able to achieve a level of innovative prowess which puts us in a market-leading position. We continuously strive to systematically increase added value for our customers, now and in the future. The AM 04 Duomatic is yet another example of us doing so, by replacing two machines with one.

We would like to take this opportunity to thank the panel of judges for this award as well as our employees for ensuring our continued success.”

**Company profile:**

Zoller + Fröhlich is a market leader in ferrules, cable assembly technology and laser measurement technology as well as a global partner for innovative solutions for building switch cabinets and special machines. As an international company, Z+F works with distributors in over 40 countries and also has operations in the U.S. and the United Kingdom through its two subsidiaries. Zoller + Fröhlich has been developing and producing all of its products exclusively in Germany for more than 50 years. The company has more than 270 employees at its headquarters in Wangen im Allgäu and is managed by the second generation of the Fröhlich family. This year, the company celebrates the 50<sup>th</sup> anniversary of the invention of the ferrule by Hans Fröhlich.
